

The freight box: It's really, *really* easy.

Introducing a simplified way to ship less-than-truckload (LTL) with packaging designed for FedEx Freight® shipments. With our new flat-rate box option for shipments less than 1,200 lbs., you get the best of both worlds — **the simplicity of small-package shipping and the security of freight shipping.**

The FedEx Freight box makes transporting LTL shipments simple, with improved flexibility, increased security, and best of all — no freight classification. Whether you're new to LTL freight or looking for an easier way to ship, our new flat-rate freight box makes freight shipping accessible for every business.

Enjoy simple, flat-rate shipping

With a distance-based pricing structure, the FedEx Freight box provides predictable, flat-rate shipping. The freight box also allows you to ship LTL with confidence by reducing the need to use the National Motor Freight Classification (NMFC) classes, which are normally used in the LTL shipping industry.

Increase security and shipment protection

By providing 360 degree protection for your LTL shipment, the freight box adds an extra level of protection to your shipments. These freight boxes help your shipments arrive intact and on time.

Improve shipping flexibility

No matter what your needs are, FedEx offers the right freight box for you. With two different size boxes, you now have more options to ship LTL the way you need. The larger box is 48" x 40" x 38" and requires a pallet to ship. The smaller 48" x 40" x 28" box has an integrated pallet.
