

**Note:** Your use of these Drawings/Plans must be reviewed and approved by qualified professionals familiar with all applicable building codes. Do not use these Drawings/Plans without consulting a qualified engineer and determining whether a building permit is required. The specific design and location of the structure, the building materials used, the quality of construction, the condition of the soils or substrates involved, and site-specific loading due to the particular characteristics of potential impact events such as earthquakes and high velocity winds will affect the strength and safety of the structure or project. For important information, please review the applicable Simpson Strong-Tie catalogs and other information available at [www.strongtie.com](http://www.strongtie.com) related to the products shown in the Drawings/Plans.
